```cpp
//Formirati binarni fajl koji sadrzi 10 rand celih brojeva brojeva:
#include <iostream>
#include<time.h>
#include <stdio.h>
#include <stdlib.h>
int main()
{
    FILE *pok;
    int i,x;
    srand(time(0));
    pok=fopen("brojevi.bin","wb");
    for(i=0; i<100; i++)
    {
        x=rand()%100+1;
        fwrite(&x,sizeof(x),1,pok);
    }
    fclose(pok);
    return 0;
}
```
